PROFILE

As a Web Developer, I started working as Frontend Developer on a web development project of a big pharma brand, using web development technologies daily such as Astro.js, React and TypeScript.

Before that, I volunteered 1+ years of my time to gain professional level experience as a self-taught full-stack web developer. Additionally, I attended an intensive coding bootcamp where I spent over 420 hours focusing on essential web development skills.

In addition to my web development experience, I also have 2+ years of IT Technical Support experience targeted to learn the ability to simplify, manage and resolve problems in a professional and timely manner.

PROJECTS

➢ **Portfolio Website**
- **Tech-stack:** Next.js, React.js, TypeScript, Tailwind CSS, Framer Motion, Resend.
